This revised directory of the Defense Documentation Center (DDC) Referral Data Bank, (previously issued in October 1970 as AD-712 800 and in July 1971 as AD-724 700) lists specialized scientific and technical sources of information which have the capability of service to the defense community, supplementary to the documentation services of DDC. The information sources, operated or supported by the Department of Defense and other Federal Government agencies, include information analysis centers and other information centers, data centers, information offices and libraries, laboratories and testing directorates, information exchanges, audiovisual depositories, etc. The Department of Defense information analysis centers are identified by an asterisk in both the table of contents and activity index.

The directory consists of a compilation of computer printouts, each of which gives for a single activity detailed descriptive information on the mission, subject areas, services and materials available, publications issued and access limitations. The descriptor field on the printout is limited to five lines because of space limitations, although additional terms are stored in the data bank for retrieval purposes. Arrangement of printouts is by referral accession number. Missing numbers represent activities which have been merged, deactivated and/or deleted. Three indexes, by activity, subject areas and director/contact, refer to the appropriate accession number and facilitate use of the directory.

To obtain further information regarding any STINFO facility, write or call the director or information specialist at the address and telephone number given.

Users of this directory are requested to report to DDC any omissions and errors of fact, as well as suggestions for improvement of future issues. Comments should be sent to the Defense Documentation Center, ATTN: DDC-TSR-2, Cameron Station, Building 5, Alexandria, Va. 22314.

13. ABSTRACT This revised directory of the information sources in the DDC Referral Data Bank (previously issued in October 1970 as AD-712 800 and in July 1971 as AD-724 700) consists of a compilation of computer printouts, each of which gives for a single activity detailed descriptive information on the mission, scope and services provided. Arrangement is by referral accession number with indexes by activity, director/contact, and subject.
